

We were proud to be part of the extensive renovation of Peak Galleria, one of Hong Kong's most iconic landmarks. This high-profile project involved a complete transformation of the retail complex to enhance its functionality, aesthetic appeal, and visitor experience.

Our scope of work included significant structural alterations to accommodate a new architectural layout. We also delivered the installation of an entirely new contemporary exterior façade, designed to modernize the building's appearance while blending harmoniously with the surrounding natural and urban landscape.
